

Customer Journey Map

1. BRAINSTORMING & IDEATION

Date	4 July 2026
Team ID	XXXXXX
Project Name	A Comprehensive Measure of Well Being
Maximum Marks	2 Marks

Define Problem Statements (Customer Problem Statement Template)

This document defines the core problem statements our project addresses, using the customer problem statement format to align our engineering effort with user pain points.

Problem Statement Analysis

PROBLEM STATEMENT (PS)	I AM (CUSTOMER)	I'M TRYING TO	BUT	BECAUSE	WHICH MAKES ME FEEL
PS-1: Policy Analyst	A policy-maker or development analyst	Estimate human development levels for a country based on health,	Raw UNDP reports are annual and do not allow real-time forecasting of	Calculating composite geometric indexes across non-linear inputs	Constrained and unable to make rapid policy assessments.

PROBLEM STATEMENT (PS)	I AM (CUSTOMER)	I'M TRYING TO	BUT	BECAUSE	WHICH MAKES ME FEEL
		schooling, and GNI targets	hypothetical indicator changes	requires complex scripting	
PS-2: Academic Researcher	A social science researcher or student	Understand the correlation and relative importance of health, income, and education towards HDI	Consolidating historical datasets, cleaning wide formats, and running statistical packages is time-consuming	Datasets are scattered and require complex ETL operations for standard analysis	Frustrated by data cleaning bottlenecks before beginning actual analysis.
PS-3: General Public	An informed global citizen	Explore how my country's development indices compare with global averages and track prediction histories	Existing indicators dashboards are static, default to light themes, and do not persist custom queries	Dashboards lack local browser caching and export utilities for personal tracking	Disconnected from direct personal interaction with development data.
