3. PROJECT DESIGN PHASE

Date	4 July 2026
Team ID	XXXXXX
Project Name	A Comprehensive Measure of Well Being
Maximum Marks	4 Marks

Problem-Solution Fit Analysis

This document describes how the specific features of the HDI Predictor solve the pain points identified for our user personas.

Persona Pain Points vs. System Solutions

USER PERSONA	CUSTOMER PAIN POINT	SYSTEM SOLUTION FEATURE	PROBLEM-SOLUTION FIT JUSTIFICATION
Policy Analyst	Needs to simulate different target indicators but lacks interactive real-time calculators.	Simulation Inputs & Range Sliders	Users can drag sliders for GNI or life expectancy and immediately see predicted changes in the HDI score and classification tier.
Academic Researcher	Finding and cleaning raw statistical	Tidy Panel Database &	A cleaned time-series dataset of 36 countries is loaded in

USER PERSONA	CUSTOMER PAIN POINT	SYSTEM SOLUTION FEATURE	PROBLEM-SOLUTION FIT JUSTIFICATION
	spreadsheets is slow and requires specialized packages.	Prefill API	the backend. Users can select any country from the dropdown to instantly load its latest indicators.
General Public	Dashboards do not save past queries, leading to lost simulations after page reload.	Client LocalStorage Caching	The JavaScript layer automatically saves predictions to localStorage and renders them in a history table, preserving data without database login.
Development Executive	Opaque predictions from "black-box" neural network models are hard to explain to directors.	Explainable Linear Coefficients	The /about page displays the model's exact weights and math steps, ensuring transparency and accountability.
