7.PROJECT DOCUMENTATION

Date	4 July 2026
Team ID	XXXXXX
Project Name	A Comprehensive Measure of Well Being
Maximum Marks	1 Mark

Sample Project Documentation (Technical Manual)

This document provides a technical manual and installation guide for the Human Development Index (HDI) Predictor.

🔧 Local Setup Instructions

1. Initialize Folder Structure & Setup Virtual Environment

Run the following commands inside PowerShell or Command Prompt:

```
# Navigate to project workspace
cd C:\Users\User\.gemini\antigravity\scratch\hdi_predictor
```

```
# Initialize python virtual environment
python -m venv venv
```

```
# Activate virtual environment
.\venv\Scripts\Activate.ps1
```

2. Install Packages

Install dependencies from [requirements.txt](#):

```
python -m pip install -r requirements.txt
```

3. Run the Machine Learning Pipeline

Compile the dataset, generate visualizations, and fit the regression weights:

```
python train_model.py
```

4. Run the Web Application

Launch the Flask development server:

```
python app.py
```

Open your browser and navigate to: 🖱️ <http://127.0.0.1:5000>

Testing the Solution

To run the automated tests verifying backend routing and model metrics:

```
python -m unittest discover -s tests
```

Authentication Details

The system is protected by a session cookie gate. * **Username:** admin (pre-filled on screen) * **Password:** admin123 (pre-filled on screen) * **Logout:** Click "Sign Out" in the sidebar or navbar to clear the session.
