

Customer Journey Map

8.PROJECT DEMONSTRATION

Date	4 July 2026
Team ID	XXXXXX
Project Name	A Comprehensive Measure of Well Being
Maximum Marks	1 Mark

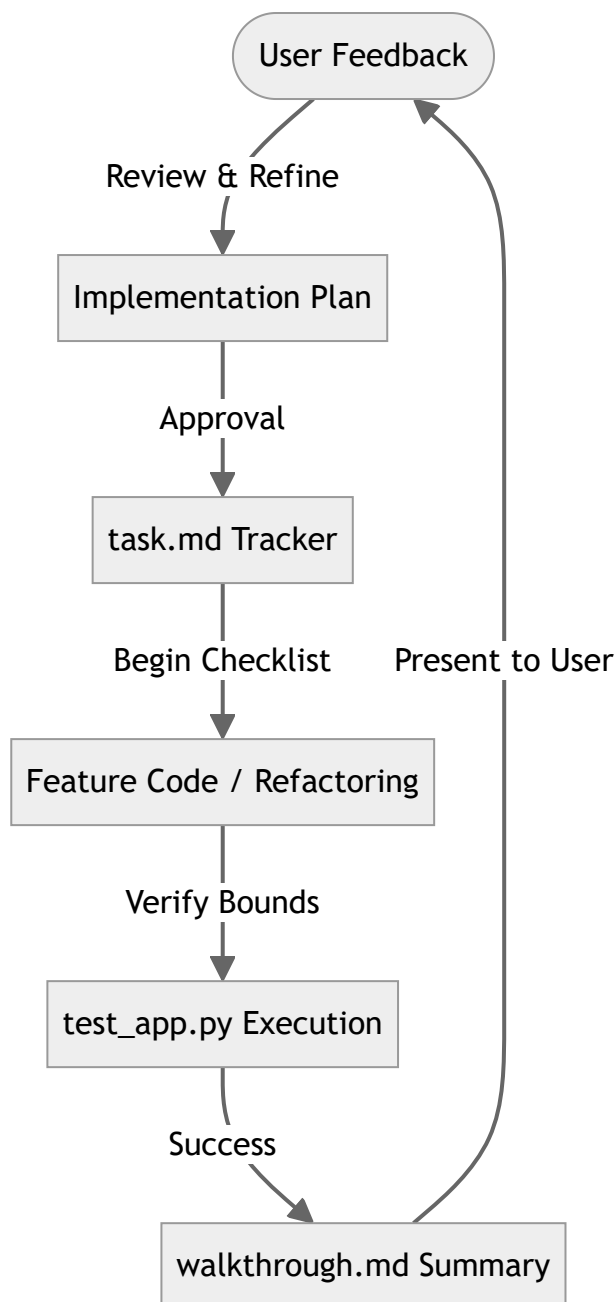

Communication & Collaboration Plan

This document details the communication strategy, task allocation framework, and feedback integration loops for our development team.

1. Communication Tools & Cadence

To ensure smooth pair programming and continuous integration, we align on these practices: * **Asynchronous Updates:** Git commits include clear messages (e.g. feat: added before_request session auth gate in app.py). * **Pair Programming:** Iterative code adjustments with the AI compiler via structured prompts. * **Testing Logs:** Terminal outputs are piped directly into task log URIs, ensuring debugging history is fully preserved.

2. Feedback Integration Loop

3. Task Ownership Mapping

- **UI/UX & Client Logic:** UI Designer (responsible for range syncing, dynamic autofills, theme changes, localStorage history).
- **ML Modeling & Pipeline:** ML Engineer (responsible for cleaning dataset, generating scatter plots, fitting linear metrics, serializing pickles).
- **WSGI Backend Server:** Backend Developer (responsible for session authentications, routing, and error handlers).
- **Quality Assurance:** QA Tester (responsible for unit tests coverage, input bounds testing).
